RADIESSE®
LIDOCAINE 

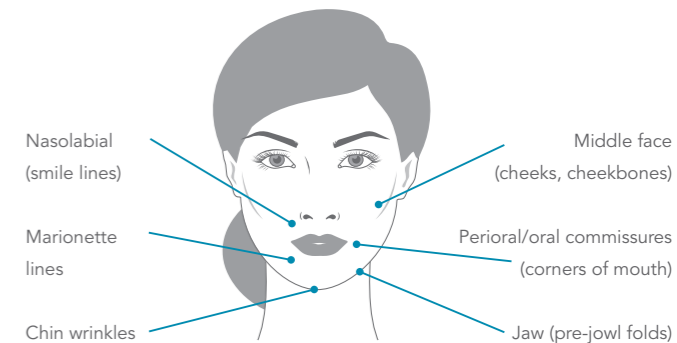

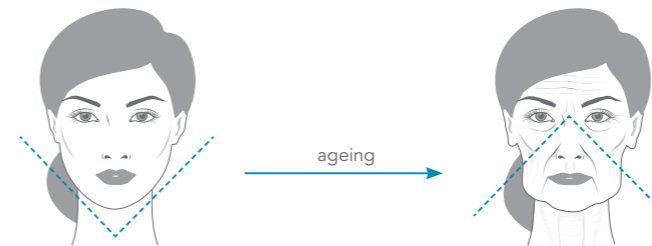

WHY LET AGE DEFINE YOU ?

We spend our entire lives defining who we are. From wardrobe to career choices, we get to decide how we appear to the world.

What happens with age? Collagen, the main structural protein which helps our skin feel and look taut and youthful, begins to slow in production, causing our skin to sag.

When the unwanted signs of aging occur, RADIESSE® Lidocaine can help you reclaim a well-defined lower face to match your inner confidence.

RADIESSE® LIDOCAINE CAN HELP IN THESE AREAS:

A UNIQUE FORMULATION

RADIESSE® LIDOCAINE VS. THE STRUCTURAL CAUSES OF AGING

RADIESSE® Lidocaine is composed of calcium hydroxylapatite (CaHA) microspheres suspended in an aqueous gel carrier.¹

Once injected, it provides immediate volume and correction, and continues to work by stimulating the body's own natural collagen production – for a long-lasting effect.²⁻⁸

Over time, the gel is absorbed and the body metabolizes the CaHA microspheres, leaving this new collagen behind.^{3,9}

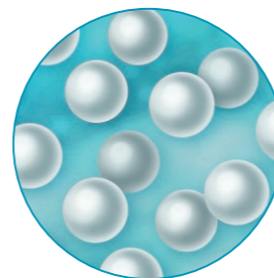

What's more, RADIESSE® Lidocaine is premixed with Lidocaine for added comfort.^{10,11}

MORE THAN SIMPLY A FILLER, RADIESSE® LIDOCAINE OFFERS A UNIQUE TRIPLE EFFECT:

- + Vertical lifting^{12,13}
- + Sharpened contours^{4,14,15}
- + Stimulating natural collagen production³⁻⁶

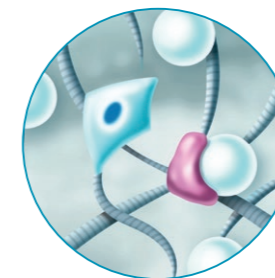

TRIPLE
+++
EFFECT

IMMEDIATE

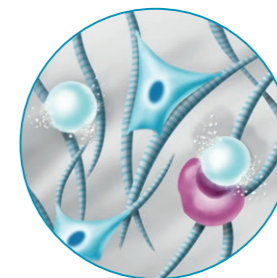

IMMEDIATE 1:1 CORRECTION^{3,9}

Gel matrix with CaHA microspheres results in effective wrinkle filling and 1:1 correction.

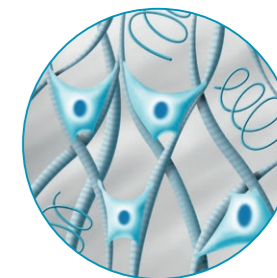

STIMULATION OF COLLAGEN PRODUCTION³⁻⁷

CaHA microspheres form a "scaffold" that triggers the production of collagen.

TIGHT COLLAGEN NETWORK STRENGTHENS THE SKIN^{4,5}

A firm network of collagen fibers forms, providing a lifting and contouring effect.

HIGH DENSITY OF COLLAGEN AND ELASTIN⁴

The newly formed network provides long-term structural support for the skin.

12 MONTHS

AND LONGER^{2,8}

MARIA

Treatment with RADIESSE®
Lidocaine in cheeks.

ALEKSANDER

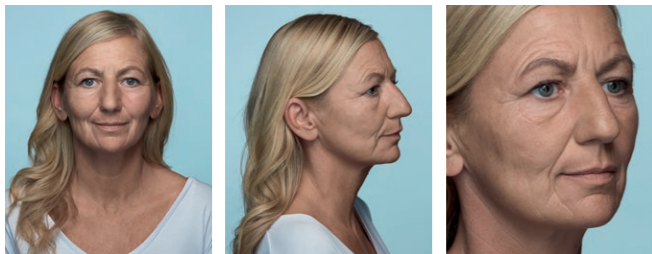

Treatment with RADIESSE®
Lidocaine in chin, jawline.

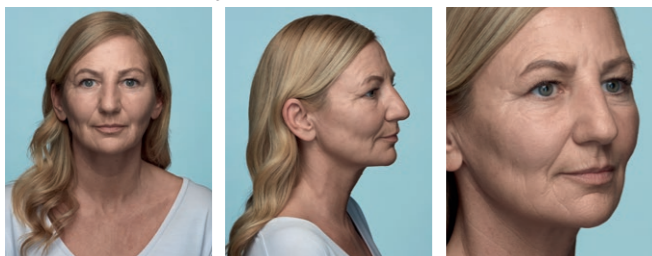

DANIELA

Treatment with RADIESSE® Lidocaine
in chin, jawline.

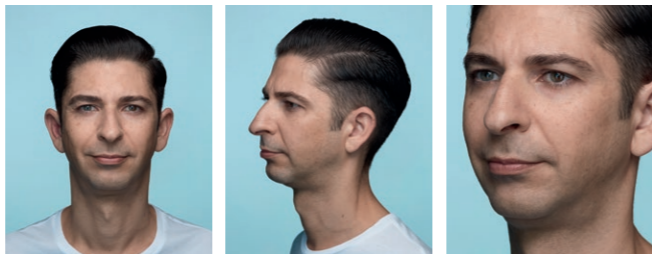

BEFORE

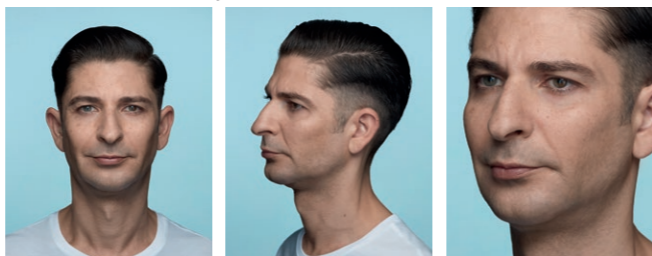

AFTER – 2 weeks after injection

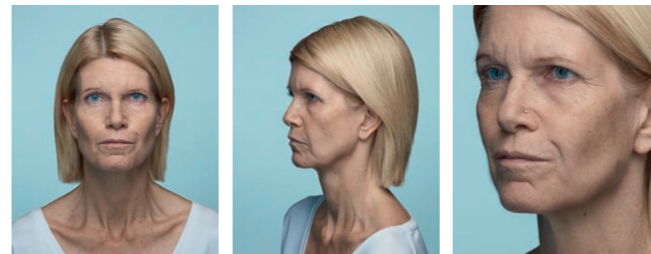

BEFORE

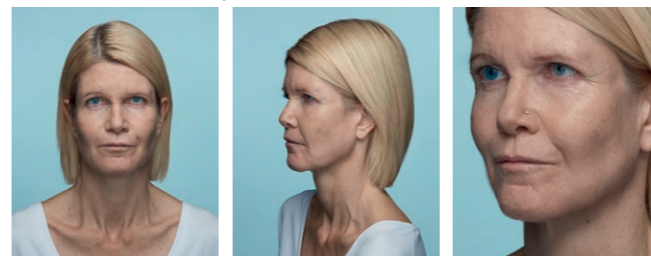

AFTER – 2 weeks after injection

WHAT TO EXPECT

- + RADIESSE® Lidocaine can be gently injected under the skin in the middle and lower face¹
- + The procedure may take as little as 30 minutes
- + After injection, RADIESSE® Lidocaine works to lift and define key areas around the lower face for an overall smoother appearance^{4-7,12,14-17}
- + The natural-looking results may last up to a year or more in many patients^{2,8}
